

First Year Fellows

Introduction to Endocrine Pathophysiology & Disease Management

- Outpatient continuity clinics at the Highgate Subspecialty Center: Fellows spend M-F mornings in Diabetes, General Endocrine, Pituitary and Thyroid Ultrasound/FNA specialty clinics.
- Inpatient Consult Service: Fellows spend 16 weeks on the inpatient consult service.
- Presentations at Endocrine Case Conference: Fellows present cases weekly to combined adult, pediatric and reproductive Endocrine faculty.
- Research: Fellows are expected to complete a research project during training. Planning this project begins during the first year.
- Conference attendance.

Second Year Fellows

Advanced knowledge acquisition in the evaluation and treatment of endocrine disorders.

- Outpatient continuity clinics at the Highgate Subspecialty Center: reduced clinic time with increased autonomy in patient care, time gaps as needed for research.
- Inpatient Consult Service: 2nd year Fellows spend 8 weeks on the hospital service.
- Conference attendance; teaching skills evaluation.
- Increased protected time for research.

Third Year Fellows

The third year is offered to all residents on an elective basis. It is not required by our program or by the ABIM for board certification in endocrinology. The 3rd year fellow is expected to spend most of their time in research.
